Do-it-yourselfers can look like professional stone masons with new products available at Kwik Stone Ltd. The slow, painstaking work of installing masonry stone finishes can now be done quicker and easier with Kwik Stone's new, innovative stone panelling and manufactured stone products.

In just three years, Kwik Stone Ltd. has established itself as the key supplier of a new "premium paneled stone product" for central and southern Alberta. Kwik Stone is setting a new industry standard with decorative stone siding made of structural polyurethane. The premium panels combine the advantages of lightweight synthetic materials with stone look so authentic you cannot tell it from the real thing.

"We provide an authentic-looking stone panel without the cost or effort of installing real or manufactured stone masonry," said Co-owner and General Manager Brian Dawes. "Kwik Stone is filling a niche by aggressively bringing these new synthetic stone products into the local marketplace."

Brian and Shannon Moench are co-owners of Quick Stone Ltd. Together they lead a team of qualified sales people and installers who put you, the customer, first. They will help

you determine which Kwik Stone product will best suit your project and then ensure you have everything you need to make it successful.

If you choose to do-it-yourself, the team will instruct you in product installation and ensure you have all the required tools to make your project a thing of beauty. If you prefer to have your Kwik Stone product installed, the experienced team of installers will measure your project to provide you with an accurate quotation before you commit to the sale.

"The new faux stone products have come a long way over the last few years," said Brian. "It is difficult to tell them from real masonry without going right up and touching them."

Panelled stone has been around for 30 years, explained Brian. With the introduction of Quality Stone, Kwik Stone's Panelled Stone product, the quality and authenticity has been greatly improved upon.

Kwik Stone products come in a variety of decorative stone-look panels and profiles that can be used as alternatives to real stone, cast stone and other imitation stone products. The panels are affordable, lightweight, durable and easy to install. They come in a variety of patterns and are practical in a range of circumstances, as both interior and exterior surfaces. Finishes

Authentic Look, Cost Effective and Installer Friendly

include stacked stone, ledge stone, castle stone, and tile stone and trim pieces. Colour choices include light and dark brown, as well as grey brown and black rundle.

"Paneled stone products are an excellent choice for both residential and commercial building," said Brian. "It cost less than stone and is faster and easier to install."

In the past weeks, Kwik Stone Ltd. has been renovating its north-side showroom located at Bay 16, 7619-50 Avenue. The renovations will showcase a new product line of interior wall finishes.

"We are excited to offer do-it-

yourselfers, contractors and interior designers an excellent product option for interior feature walls and fireplaces," said Brian. "We invite everyone to come in and discover the authentic look of stone in an easy to use product."

Kwik Stone Ltd also has a masonry division, which carries four different lines of manufactured stone. Kwik Stone supplies Eldorado Cultured Stone Coronado and Country Stone to meet those masonry needs. Check out the Kwik Stone website for decorating ideas at [www.kwikstone.ca](http://www.kwikstone.ca).
